

Mr. Chairman, today, I cosponsored an amendment to withdraw the global 'gag' language from the Foreign Operations Appropriations bill. The language denies U.S. family planning funding to any overseas organization that uses its own non-U.S. funds to provide abortion services. The family planning dollars appropriated in this bill are critically important to the prevention maternal and child deaths and the continued spread of STDs. Congress should not make the allocation of this life saving funding contingent on how a foreign organization chooses to spend its own dollars.
