

A Living Roof Over Your Head

Thursday, 30 June 2011 13:11

Communities all over the world are using eco-roofs to manage environmental issues. This week, Congressman Blumenauer visited Columbia Green Technologies Inc., an American eco-technology company based in Portland, Oregon. Columbia Green's focus is on eco-roofs, specially designed vegetative roofs that help manage the quality and quantity of storm water, energy use, and air and water pollution. Columbia Green currently manufactures these products in Oregon and delivers them to customers both in the United States and internationally.
